DETAILED ACTION

This communication is responsive to the amendment filed July 6, 2005.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 5-7 are rejected under 35 U.S.C. 102(b) as being anticipated by FR ('579).

FR ('579) discloses a positive engagement clutch comprising an input side, an output side, a torque input member, a torque output member, first engagement members (4), second engagement members (5), a common axis, projecting and retracting positions, a gap (area occupied by the engagement members), and bearings.

Claims 1 and 3-7 are rejected under 35 U.S.C. 102(b) as being anticipated by FR ('290).

FR ('290) discloses a positive engagement clutch comprising an input side, an output side, a torque input member, a torque output member, first engagement members, second engagement members, a common axis, projecting and retracting positions, a gap (4), rollers (9), a push rod element (16).

Allowable Subject Matter

Claim 8 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed July 6, 2005 have been fully considered but they are not persuasive.

Concerning applicant's argument that the prior art do not show engagement members projecting into a gap, the examiner respectfully disagrees. For example, FR ('290) discloses engagement members in a gap (4). Noting that the element extends/projects in the gap, the rejection is deemed proper. Regarding FR ('579), a similar observation is made regarding the extension of the engagement members in the shown passages. Also, see minor clarification to the claim rejection.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
